From the moment we're born, we're curious about the world around us. We want to know how things work, what makes them tick, and why they do the things they do. This curiosity is what drives us to explore, to experiment, and to learn.

For some people, this curiosity never goes away. They continue to experiment and explore throughout their lives, always looking for new ways to learn about the world. These people are often called "homebrew scientists."

Homebrew science is the practice of conducting scientific experiments at home. It's a great way to learn about science, have fun, and save money. And it's something that anyone can do, regardless of their age or experience level.

In his new book, *Don't Try This at Home*, author and homebrew scientist Dan Riskin takes readers on a thrilling ride through the world of homebrew science. Riskin shares his own experiences conducting homebrew science experiments, from building a nuclear reactor in his backyard to launching a rocket into space.

Riskin's book is full of fascinating stories, helpful tips, and cautionary tales. It's a must-read for anyone who's interested in homebrew science, or who just wants to learn more about the world around them.

### **What You'll Learn from *Don't Try This at Home***

In *Don't Try This at Home*, you'll learn:

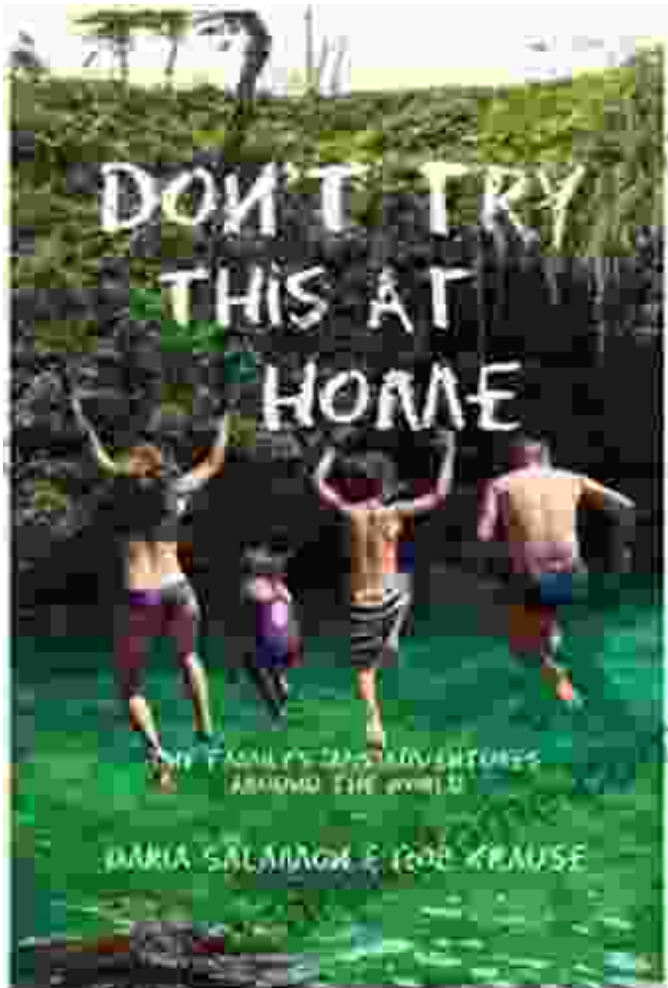

- The basics of homebrew science
- How to conduct safe and successful homebrew science experiments
- The history of homebrew science
- The latest advances in homebrew science
- And much more!

### **Who Should Read *Don't Try This at Home***

*Don't Try This at Home* is a great read for anyone who's interested in science, homebrew science, or just learning more about the world around them. It's also a great book for parents who want to encourage their children to learn about science.
