

# Three Degrees of Freedom: A Revelatory Exploration into the Quantum Universe

## Degrees of Freedom (DOF)

Planar (2D) mechanisms

*Degrees of Freedom* – number of independent coordinates required to completely specify the position of the link

Three independent coordinates needed to specify the location of the link AB,  $x_A$ ,  $y_A$ , and angle  $\theta$

All unconstrained links in the plane has three degrees of freedom, mechanism with  $L$  links has  $3L$  degrees of freedom
