Are you or someone you know struggling to make sense of the world around them? Do loud noises, bright lights, or certain textures send you into a tailspin? You may be one of the millions of people who experience sensory differences.

Sensory differences are variations in the way people process and respond to sensory information from their environment. These differences can affect how someone interacts with their surroundings, their daily routines, and their overall well-being.

If you're looking for a comprehensive guide to understanding and supporting sensory differences, look no further. The Making Sense Guide to Sensory Issues is your essential resource.

This groundbreaking book provides a wealth of information on sensory processing, including:

- What sensory processing is and how it works
- The different types of sensory differences
- How to identify and assess sensory differences

- Strategies for supporting individuals with sensory differences
- How to create inclusive and supportive environments

The Making Sense Guide to Sensory Issues is written by a team of experts in the field of sensory processing. The authors have decades of experience working with individuals with sensory differences, and they share their insights and strategies in this book.

Whether you're a parent, an educator, a therapist, or a professional working with individuals with sensory differences, this book is an essential resource. It will help you to understand the challenges that individuals with sensory differences face, and it will provide you with the tools you need to support them.
